

A. Profile of my client

1. My client is Sandy Andrews, a local crafter who creates handmade items such as seasonal decorations, papercrafts, personalized gifts, cards, and various craft projects. She serves people who enjoy unique, handcrafted items, especially those looking for personalized or one-of-a-kind pieces that aren't available in mass-produced retail stores. Her work is rooted in creativity, attention to detail, and a passion for making items that bring joy to others. This started as a hobby of hers during COVID and grew from there. She often creates pieces for friends, family, local craft fairs, and community events, and she wants a more organized way to showcase her work.

2. Mission Statement:

To share high-quality, handmade crafts that bring creativity, warmth, and personality, while offering a welcoming space for customers to explore unique, handcrafted items.

Client's Goals for the Website:

- To display her craft projects in an organized, visually appealing way
 - To provide information about each item, including materials, size, and pricing
 - To highlight which items are currently available for sale
 - To make it easier for potential customers to browse her work and contact her
 - To establish an online presence instead of just posting on Facebook or having binders of work for people to flip through
3. **Website** - No, my client does not already have a website.

B. Profile of the Target Audience

1. Primary Target Audience

The primary audience for Sandy Andrews' craft website is adults who value handmade, personalized, and locally made items, especially those shopping for gifts, seasonal décor, or unique home accents. These visitors are often community-oriented, enjoy supporting small businesses, and appreciate creativity over mass-produced products.

2. Target Audience Details

Demographics

- **Age Range:** 30–65 years old
(Adults who purchase gifts, decorate their homes seasonally, or attend craft fairs)
- **Gender Distribution:** Predominantly female (about 70%), with male visitors (about 30%) often shopping for gifts
- **Country of Residence:** United States (primarily local or regional customers)
Urban or Rural: Mostly suburban and rural areas, including small towns and local communities

Socioeconomic Details

- **Average Income:** \$40,000–\$85,000 per year
(Disposable income for gifts, décor, and hobby-related purchases)
- **Education Level:** High school diploma to college degree
- **Marital / Family Status:** Many are married or have families; some are grandparents or parents shopping for personalized items
- **Occupation:** Teachers, office workers, healthcare workers, small business owners, retirees, and stay-at-home parents
- **Average Work Hours:** 30–45 hours per week

Web Behavior

- **Web Usage Frequency:** Daily or several times per week
- **Devices Used:**
 - Primarily smartphones
 - Also, laptops and tablets for browsing products more closely

Target Audience Personas						
Name	Sex	Age	Location	Occupation	Annual Income	Web Usage & Devices
Linda Miller	Female	42	Suburban Connecticut	Elementary School Teacher	\$62,000	Daily web use; browses on smartphone and laptop for gifts and seasonal décor
Mark Thompson	Male	55	Rural Rhode Island	Small Business Owner	\$78,000	Uses the web several times a week; prefers tablet for browsing unique items
Jessica Perez	Female	34	Small-town Massachusetts	Office Administrator	\$48,000	Daily smartphone user; frequently shops online and explores craft sites

3. Reasons People Would Visit Sandy's Craft Website

1. Browse handmade crafts and seasonal decorations
2. Look for unique or personalized gifts
3. Check which items are currently available for purchase
4. View details such as materials, size, and pricing
5. Get inspiration for home décor or holiday decorating
6. Contact the crafter about purchasing or custom orders
7. Learn more about the artist and her creative process
8. Decide whether to visit her at a craft fair or community event

Assigned Tasks by Persona

Linda Miller – The Thoughtful Gift-Giver

Primary Reasons for Visiting

- Find personalized gifts for friends and family

- Browse seasonal and holiday décor
- Support a local artisan

Tasks Linda Would Perform

- Browse the craft gallery by category (cards, decorations, gifts)
- Click on individual items to view descriptions and prices
- Check availability status
- Use the contact form to ask about customization options

Mark Thompson – The Practical Shopper

Primary Reasons for Visiting

- Quickly find a unique gift
- Confirm pricing and availability
- Contact the seller with minimal effort

Tasks Mark Would Perform

- Use filters to view items that are currently for sale
- Scan item listings for price and size
- Navigate directly to the contact section
- Save or bookmark items for later purchase

Jessica Perez – The Creative Enthusiast

Primary Reasons for Visiting

- Browse handmade crafts for inspiration
- Discover new seasonal items
- Follow or support a local creator

Tasks Jessica Would Perform

- Scroll through image galleries on her phone
- View multiple product photos
- Read item descriptions and materials used
- Share items or return to the site later

C. Website Design Consult

1. Define Purpose

- **What is the primary goal of the website?** To share artwork through an online platform that allows viewers to browse and see what is available.

- **What is the single most important action you want users to take on the website?** Browse available items and contact Sandy to inquire about purchasing or custom orders

2. Key Messages & Content

- **What is the main message you want to convey to your audience?** The joy of handmade crafts
- **What are the most critical pieces of information users must see immediately on the homepage?** The purpose of the website is to share art and a bit about the creator, as well as some highlighted art that cycles through the images
- **Do you have any existing content or text for the website? If yes, please share it.** Yes, the name is Critter Heaven Crafts
- **Are there specific photos, videos, or graphics you'd like included? If yes, please share it.** High-quality photos of all crafts will need to be acquired, along with the descriptions, materials, and prices, which will be sent at a later date
- **Do you have a logo? If yes, please share it.** No logo yet

3. Desired Features

- **What specific features do you want on the site?**
 - View various categories of art, contact page, ability to control what art is shown, able to update descriptions, price, etc log in feature for security
- **Which features are essential, and which are “nice to have”?**
 - Those features are all essential; a nice-to-have would be a customer able to leave reviews, and actually buy items online instead of having to email to buy

4. Inspiration & Preferences

- **Can you provide examples of websites you admire? What do you like about them?** N/A - no examples were given
- **Are there any design elements or website functionalities you dislike? If so, why?** Nothing monochromatic or modern looking, but at the same time, no clashing colors as it should have the same feel as the art fun and whimsically
- **What image, look, or feel do you want the website to convey (i.e., modern, minimalist, playful)?** More of a fun, creative website to showcase the same feeling of the art
- **Do you have an existing style guide, color palette, or typography preferences?** Base of country blue and more rustic looking, but creative freedom has been given

5. Navigation & Structure

- **What are the key pages or sections the website should include (i.e., About, Services, Contact)?**
 - Home
 - About
 - Gallery / Shop

- Cards
- Papercrafts
- Alcohol Ink Flower Prints
- Alcohol Ink Flower Tiles
- Shadowboxes
- Miscellaneous Crafts

Contact

- **What should the main navigation look like?** The main navigation should be a simple, horizontal menu at the top of the page with clear, easy-to-read labels. It should prioritize ease of use for mobile visitors and allow users to quickly find specific craft categories or contact information
- **Do you need subpages or dropdown menus? If yes, for which sections?** Yes. A dropdown menu should be used under the Gallery/Shop section to organize craft categories, including Cards, Papercrafts, Alcohol Ink Flower Prints, Alcohol Ink Flower Tiles, Shadowboxes, and Miscellaneous items. This keeps the navigation clean while making it easy for users to browse specific types of crafts.

6. Competitor Analysis

- **Who are your main competitors?** Other crafters
- **What do you like about their websites?** Not many have websites, but the colors and vibes are welcoming, making it an enjoyable experience
- **What do you dislike about their websites?** Some websites are too cluttered and have too much going on making them feel overwhelming
- **How do you want your website to stand out from theirs?** Not many have websites, so having one will help, as well as making it personalized and the crafts being unique. Also having a background about the craft will help people feel a connection to the art.

7. Audience Engagement

- **How do people currently find you online?** Facebook posts
- **Are your clients or customers one-time visitors, or do they return frequently?** Mix of both
- **Are you active on social media? If so, which platforms?** Not very active but mostly on Facebook
- **Do you rely on referrals or customer reviews to drive traffic?** Referrals and word of mouth as well as craft fairs

8. Maintenance & Updates

- **How often will you need to update the website?** Once a month
- **Who will be responsible for maintaining the site (i.e., your client, a hired professional)?** Maintaining products on site will be the client while the actual site itself will be left to me

- **Do you anticipate needing assistance with updates or changes? If yes, how frequently?** No assistance will be needed

D. Design & Prototyping

Refined SDLC Approach & Timeline

Chosen SDLC Model: Agile

An Agile SDLC approach is best suited for Sandy's craft website because the project benefits from flexibility, frequent feedback, and visual iteration. Since the client is focused on appearance, organization, and ease of browsing, Agile allows regular check-ins where Sandy can review layouts, navigation, and gallery structure before moving forward.

Client feedback during consultation emphasized:

- A clean, simple layout (not overwhelming)
- Easy navigation
- Clear organization of craft categories
- A database-backed gallery so items can be updated easily without redesigning pages

Project Timeline Overview (8 Weeks)

The project is divided into six main phases, with milestones at the end of each phase for client review and approval.

12-Week SDLC Timeline (Agile Phases)

Phase 1: Planning & Requirements (Weeks 1)

Milestones:

- Finalize client goals and website purpose
- Confirm target audience and personas
- Review page list and navigation structure
- Discuss database needs and item fields
- Gather client feedback on layout preferences and organization

Phase 2: Design (Week 2)

Milestones:

- Create wireframes for key pages (Home, Gallery, Contact)
- Design navigation menu and dropdown structure
- Plan mobile-first responsive layout
- Review visual style (colors, fonts, image layout)

Phase 3: Development – Frontend (Weeks 3–6)

Milestones:

- Build page structure using HTML/CSS
- Implement responsive navigation and dropdown menus
- Create gallery and category pages
- Style pages for visual consistency

Phase 4: Development – Backend & Database (Weeks 7–9)

Milestones:

- Design database schema for craft items
- Connect gallery pages to database
- Enable dynamic loading of items
- Implement availability indicators

Phase 5: Testing & Refinement (Weeks 10–11)

Milestones:

- Test site on multiple devices and screen sizes
- Validate navigation and dropdown functionality
- Test database connections and item display
- Gather final client feedback and make adjustments

Phase 6: Deployment & Final Review (Week 12)

Milestones:

- Final content review
- Accessibility and usability check
- Prepare site for launch
- Walkthrough with client
- Deliver final documentation
