

Design & Prototyping

Refined SDLC Approach & Timeline

Chosen SDLC Model: Agile

An Agile SDLC approach is best suited for Sandy Andrews' craft website because the project benefits from flexibility, frequent feedback, and visual iteration. Since the client is focused on appearance, organization, and ease of browsing, Agile allows regular check-ins where Sandy can review layouts, navigation, and gallery structure before moving forward.

Client feedback during consultation emphasized:

- A clean, simple layout (not overwhelming)
- Easy navigation, especially on mobile
- Clear organization of craft categories
- A database-backed gallery so items can be updated easily without redesigning pages

Project Timeline Overview (8 Weeks)

The project is divided into six main phases, with milestones at the end of each phase for client review and approval.

12-Week SDLC Timeline (Agile Phases)

Phase 1: Planning & Requirements (Weeks 1)

Milestones:

- Finalize client goals and website purpose
- Confirm target audience and personas
- Review page list and navigation structure
- Discuss database needs and item fields
- Gather client feedback on layout preferences and organization

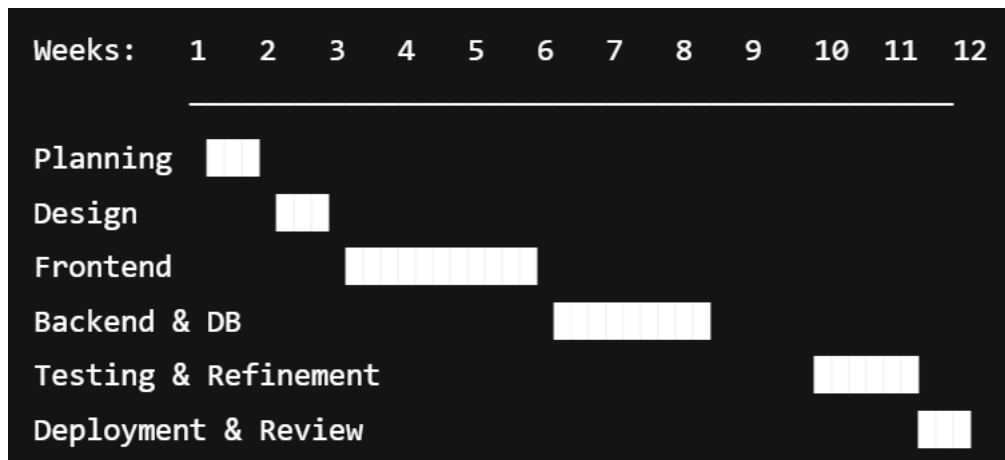

Phase 2: Design (Week 2)

Milestones:

- Create wireframes for key pages (Home, Gallery, Contact)
- Design navigation menu and dropdown structure
- Plan mobile-first responsive layout
- Review visual style (colors, fonts, image layout)

Phase 3: Development – Frontend (Weeks 3–6)

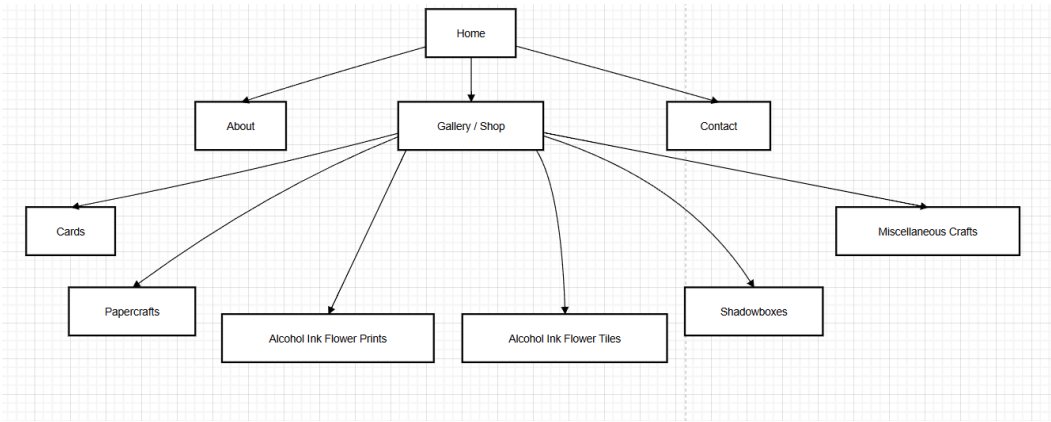

Milestones:
